The collection of mannure indiscriminately in all parts of the town, particularly in pits and moats must be avoided. All manure must be taken away from the town.

The several pits near the river margin on which water stagnates must be sprayed on the lines done in Hiriyur after consulting the Director of Public Health. The other pits must be filled up where possible or their edges sloped off and turfed to prevent them being soiled.

Hotel bye-laws must be enforced and Hotels controlled by proper authorities as most of the floating population and coolies depend on them for their food at present.

Dust bins (stone slab contruction) must be provided where possible and cleared properly.

Roads must be widened where possible and proper sweeping enforced.

Unless timely and proper steps are taken to speed up all required sanitary measures it will be very difficult to manage afterwards as the town is growing by leaps and bounds. The Military authorities may be requested to contribute towards the improvement of the town as every time epidemic diseases like cholera and smallpox appear in the town, they are also threatened.

I am glad to note that the President and Members of the Municipality have realised the importance of timely action and request them to take measures on the lines suggested.
